INDONESIAN FOUNDRY INDUSTRIES ASSOCIATION established on December 9, 1981 is an organization that is used as a tool of struggle to create a healthy industrial climate in Indonesia, striving for industry to grow and develop towards a self-reliant industry that is strong and efficient so that its products can compete strongly in the global market.

Vision

To place the Indonesian foundry – a strategic up-stream industry – in a strong and firm position and to become the foundation for developing machinery and metal industry, so that it will be able to help accelerate the national economic growth.

Mission

To assemble companies which are working on foundry and those involved with foundry. To strengthen relationship, to initiate cooperation and to harmonize common steps among foundry industries. To realize a self- supporting machinery and foundry industry. To apply valuable and appropriate technology, so that the products are able to compete on the global market.
